-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Claims 1-38 and 40 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected Group, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 9.

2. Applicant's election with traverse of Group IV in Paper No. 9 is acknowledged. The traversal is on the ground(s) that examination of all claims simultaneously would not place undue burden on the Examiner. This is not found persuasive because claims are drawn to a system for soft tissue reconstructive surgery, a method for soft tissue reconstructive surgery, soft tissue fasteners (numerous species), a method of paravaginal repair, method for diagnosing pelvic floor defects, as well as numerous other species and even a template disclosed. These all have separate classifications. Thus, restriction is deemed proper and the search for all disclosed would cause undue burden on the Examiner.

The requirement is still deemed proper and is therefore made FINAL.

Drawings

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference sign(s) not mentioned in the description: element 38. A proposed drawing correction, corrected drawings, or amendment to the specification to add the reference sign(s) in the description, are required in reply to the

Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

5. Claim 39 recites the limitation "the stapling device" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102/103

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claim 39 is rejected under 35 U.S.C. 102(e)/103(a) as being anticipated by Carter et al. in US Patent No. 6,044,847.

Carter et al. disclose a method of surgical paravaginal repair, as recited in column 5, lines 34-36, via providing a soft tissue fixation device, as recited in column 3, lines 1-18 and column 7, lines 31-42; providing an insertion device adapted for inserting the soft tissue fixation device, as recited in column 7, lines 60-62; placing the soft tissue fixation device at least one of vaginally and laparoscopically through the fixation device, as recited in column 9, lines 50-67; and approximating at least one of the superior

lateral sulci and inferior lateral sulci to the lateral pelvic sidewall without exposing the lateral pelvic sidewall through a surgical incision in a vaginal wall, as recited in column 9, lines 50-67 and seen in figure 15A-D.
